

Inspection Alignment Overview

How R4 maps to KHDA, BSO, ISI & Ofsted safeguarding criteria.

Inspectors don't ask whether you care about bullying. They ask you to show them how you handled the last three incidents, what systems your staff follow, and what evidence you can produce. The R4 Framework is designed to generate that evidence automatically — every protocol produces a document, every response creates a record.

WHAT INSPECTORS ASK. WHAT R4 PROVIDES.

Inspector Question	R4 Response	Evidence Generated
How do students report bullying?	Multi-channel reporting: trusted adult, digital form, anonymous drop, peer ambassador, parent channel. Every report acknowledged within 24 hrs.	Report log with timestamps, channel used, acknowledgement record
What happens when a student reports?	24-hour response protocol: 0–2 hrs safety check & evidence preservation, 2–12 hrs triage & parent notification, 12–24 hrs action plan.	Time-stamped response record, role assignments, action plan documentation
How do you know your approach works?	Governance dashboard tracking incident trends, response times, recurrence rates, and resolution outcomes. Data reviewed termly.	Dashboard exports, termly trend reports, anonymised board data
How do you address digital and AI-assisted harm?	Platform-specific protocols across WhatsApp, Discord, Instagram, TikTok. AI threat awareness: deepfakes, voice cloning, fabricated evidence.	Digital incident logs, platform-specific response records, evidence preservation docs
How are parents engaged in prevention?	3-tier parent workshop series (Early Years & Primary, Secondary, and Digital Safety). Parent Toolkit with playbook, scripts, AI risk guide.	Workshop attendance, toolkit distribution logs, parent communication register
What student curriculum is in place?	Ages 3–18 across three stages: Early Years (6 sessions), Primary (12 sessions), Secondary (14 sessions). 32 sessions with facilitator scripts.	Session delivery records, completion tracking, curriculum mapping docs
What training have staff completed?	18-hour R4 Certification across 8 modules. Certified R4 Practitioner designation. Annual refresher. New staff onboarded within first term.	Certification register, CPD records, completion timestamps, assessment results
How do governors oversee safeguarding?	Termly governance reports via dashboard exports. Anonymised data. Trend analysis and risk flagging. Board-ready reporting format.	Board meeting minutes with safeguarding data, termly governance pack

REGULATORY ALIGNMENT

R4 aligns with the safeguarding expectations of major inspection bodies:

Body	Region	R4 Alignment
KHDA	Dubai, UAE	Safeguarding indicators, student wellbeing, digital safety expectations
BSO	International	British Schools Overseas safeguarding compliance, pastoral care evidence
ISI	UK / International	Independent Schools Inspectorate regulatory compliance, pupil welfare
Ofsted	UK	Personal development, behaviour and attitudes, safeguarding effectiveness
ADEK	Abu Dhabi, UAE	Student welfare and safeguarding standards, bullying prevention requirements

THE R4 EVIDENCE FILE

Every R4 implementation generates a comprehensive evidence file for inspections:

- Incident logs with timestamps, severity classification, and response records
- Response timeline documentation showing 24-hour protocol adherence
- Staff training register with certification status, CPD hours, and module completion
- Risk audit records including physical hotspot assessments and digital platform reviews
- Governance reports with termly trend data, anonymised incident summaries, and risk flags
- Student curriculum delivery records with session completion tracking across all three age stages (3–18)
- Parent engagement documentation: workshop attendance, toolkit distribution, communication logs
- Policy documentation customised to your inspection body and annually reviewed

This documentation is not produced after the fact. It is generated automatically through the R4 system as part of daily operations. When an inspector asks, the evidence already exists.
